

Call for distributors (Business Partners) in Each Country/area

According to our sales policy, we plan to choose regional distributors, only need to order simple parts of Ecologix MBR modules (cassette), assemble complete modules (cassette) locally, and do not need to buy a complete set of modules to reduce partner costs, Reduce shipping costs, but also fast delivery to serve local customers.

The country/areas included are Southeast Asia and Central Asia, all partners would be required to purchase the 3 parts listed below. then a stainless-steel welded factory needed to quickly assemble our module(cassette) according to our specifications, or distributor required purchase one units of module (cassette) as a sample.

- 1) Membrane Plate (element)
- 2) Air diffuser
- 3) Element insert track

Ecologix will assist distributors establish local assembly technology of Ecologix flat-sheet module (cassette), **which will further increase the overall profit for all area distributors.**

Welcome !!

[Ecologix MBR module brochure](#)

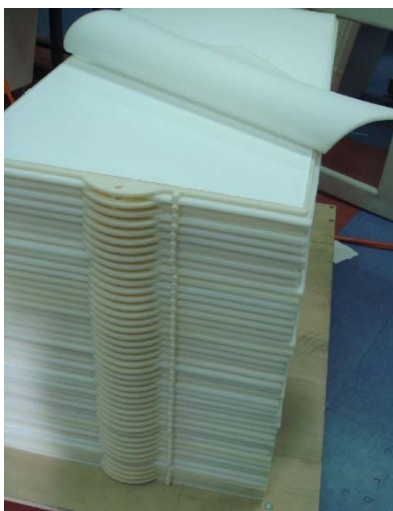

Ecologix membrane plate only uses two brands of membranes:

- Microdyne-Nadir (Germany), PVDF-0.05 micron
- GS YUASA membrane (Japan), cPVC-0.2 micron, double-sided functional layer (Same as KUBOTA membrane)

With GS YUASA membrane plate packing machine plus microdyne support (PVDF membrane supply), Ecologix encapsulates the MBR membrane plate (element), resulting in a world class quality product with an affordable price.

■The EK-08 element also can replace Kubota #510 element

Partners only order 3 parts:
Element, Air diffuser, Insert track

Element (membrane plate)

left: Air diffuser ; Right: Insert track

Module support structure that's easy to assemble at local welded factory!

Welcome to cooperation with Ecologix...
